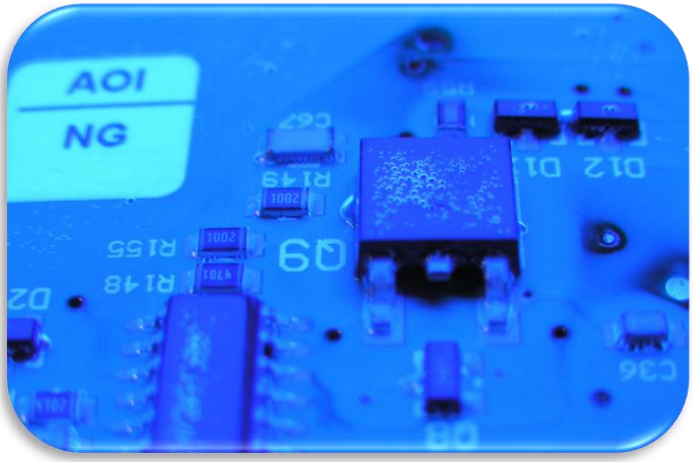
Conformal Coating Troubleshooting

What happens when a problem occurs in your conformal coating process?

When problems occur in the coating line it can be a disaster for production. When time is critical it is normally quicker and lower cost to ask an expert what the problem is and fix it. Our troubleshooting experts have solutions for the majority of conformal coating issues and long down times and costly analysis can be significantly reduced.

Common problems seen by our consultants include

- Long term reliability problems in the field Conformal Coating defects after application such as de-lamination, de-wetting and scavenging
- Contamination on the printed circuit board causing process issues
- Application equipment failures unrelated to machine malfunction
- Change in Conformal Coating Material behavior with no apparent explanation



If you recognise any of these issues or symptoms and need help in solving why they occur then you can talk to us and we will help you find solutions to the problems.

SCH Technologies is a Consultant Member of the unique Nexus3C Conformal Coating Consultancy.

This allows customers of SCH to receive unparalleled service, knowledge and analysis to address the many issues and problems which occur regularly in the world of electronics manufacturing related to coating, cleanliness and long term reliability. The consultation services SCH can offer help with troubleshooting, new product introduction (NPI), bench marking and support contracts.

Contact us directly so that we can help you now.

SCH Technologies offer

- Global Conformal coating Subcontract Services in North America, Europe and Asia
- Global supply of Conformal Coating Application Equipment
- Electronic Process Materials
- Conformal Coating Training courses
- Conformal Coating Consultation & troubleshooting
